Subject: FW: window

Below is the window we are asking for on the second and third floor Nobby Shop building. Marine Home Center is lending us the top and bottom sash from the showroom, it apparently is the only one that is not in use on the island, it takes 6 weeks to get windows right now. It will be in the building starting next Friday and only in over the weekend. It will be in the second floor left most window as you are looking at the building from Main Street. Will let you all know when it is in. Linda

Just to clarify, and as you present the narrative to the HDC, the product that you are looking at is:

Marvin Simulated Divided Light:
5/8" SDL with spacer bar and putty exterior glazing profile.

Hope it works.

Thx

Mark
